

Welcome

The session will begin shortly. Please get yourselves comfortable and check that your computer volume is on so you can hear us nice and clearly when we start.

We will be with you very soon.

Animal Biology

Taster Session with Arran Wilson

What is Biology?

The word biology is derived from the Greek words bios (meaning life) and logos (meaning study).

- 
- A photograph of two zebras standing in a savanna landscape. The zebras are facing left, with their heads turned slightly towards the camera. They have black and white stripes. The background is a blurred green and brown landscape.
- Musculoskeletal and integumentary systems
 - Digestive system
 - Nervous system
 - Circulatory and respiratory system
 - Reproductive system
 - Excretory system
 - Thermoregulatory system
 - Cell Biology
 - Taxonomy

What you will be studying!

10 Animals With Crazy Names

Spiny
lumpsucker

Pink fairy
armadillo

Tasselled
wobbegong

Raspberry
crazy ant

Hellbender

Chicken turtle

Goblin shark

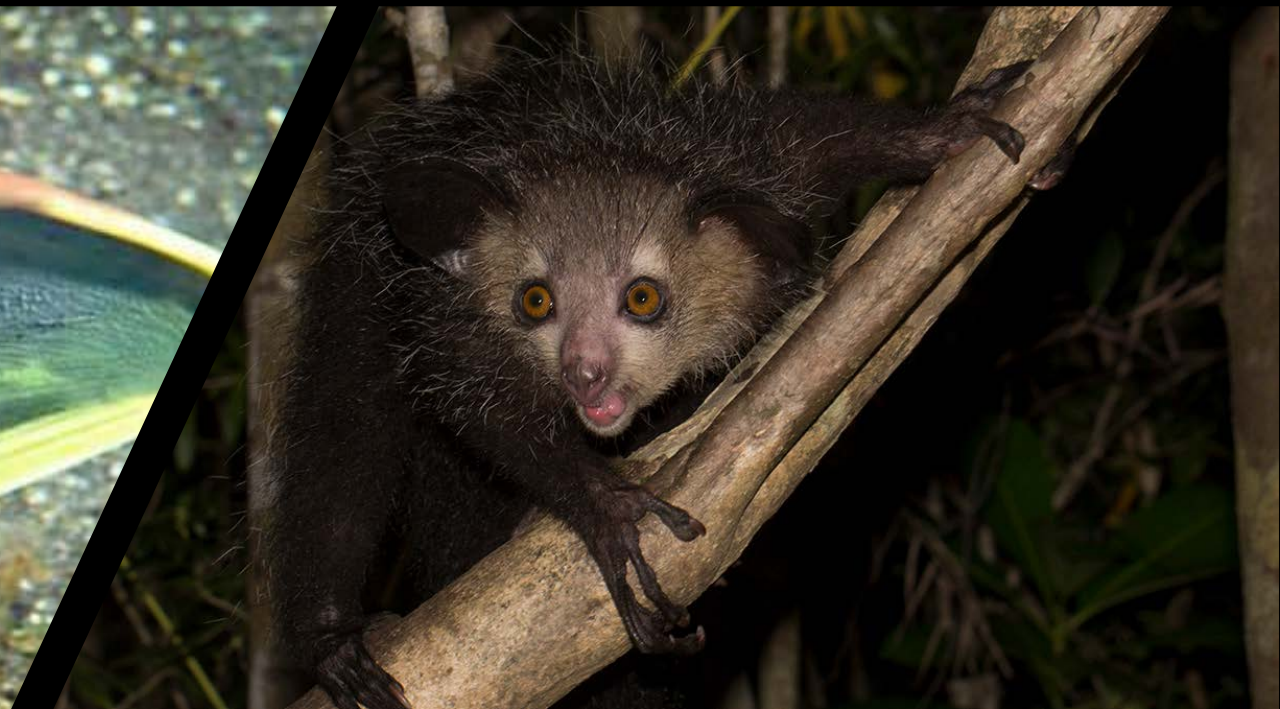

Hummingbird
hawk-moth

Frilled-necked
lizard

Strange-
tailed tyrant

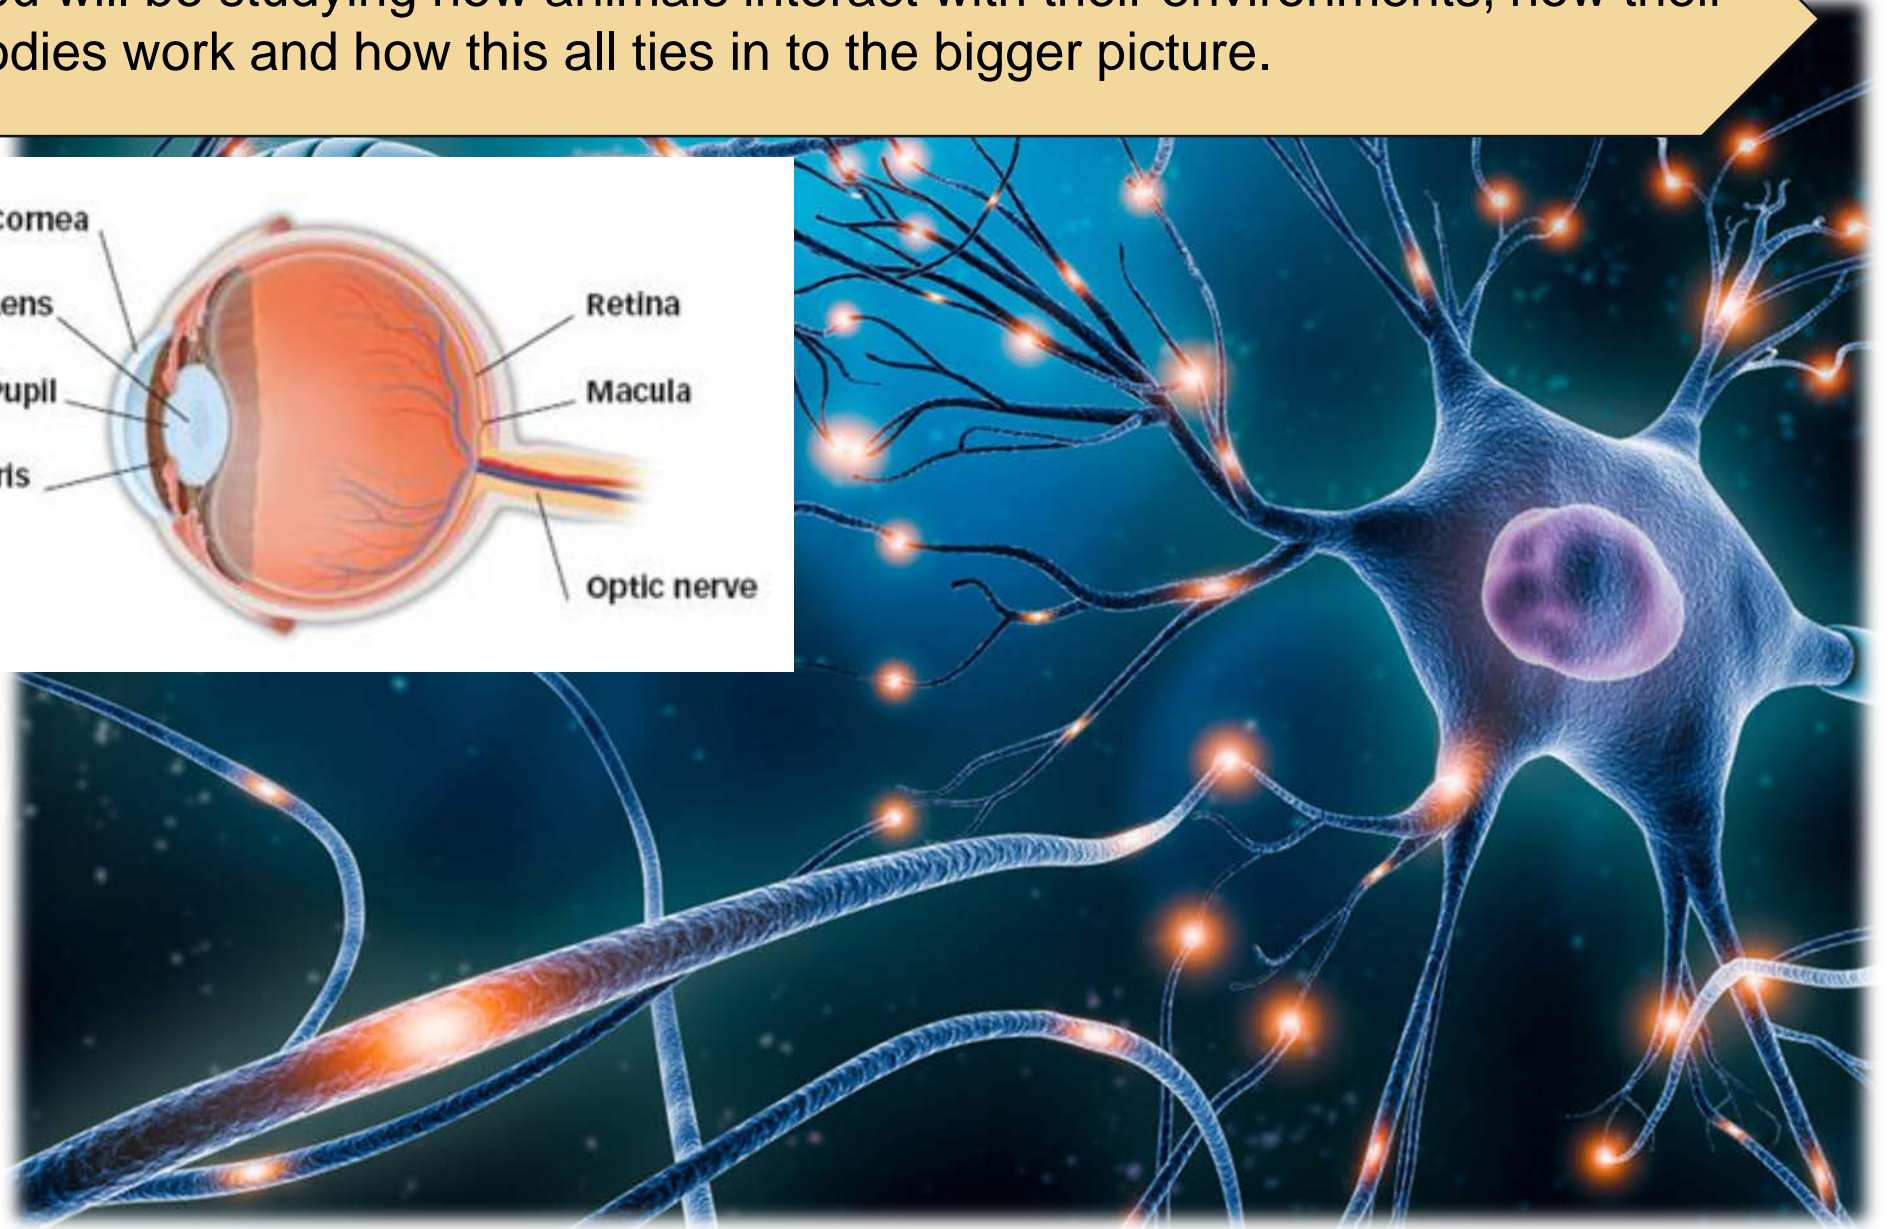

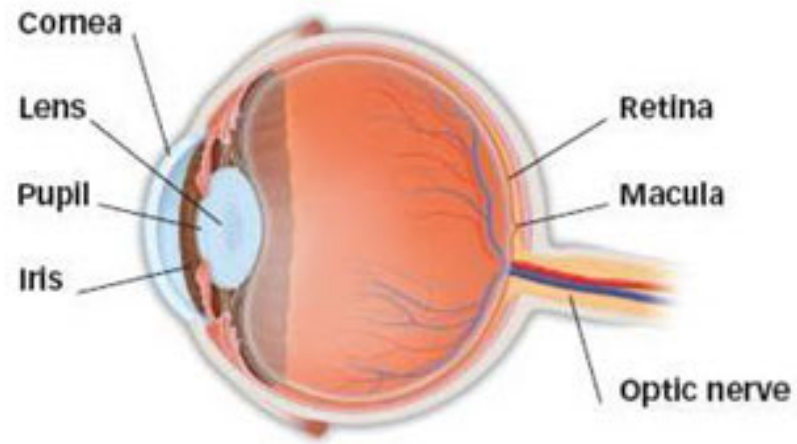

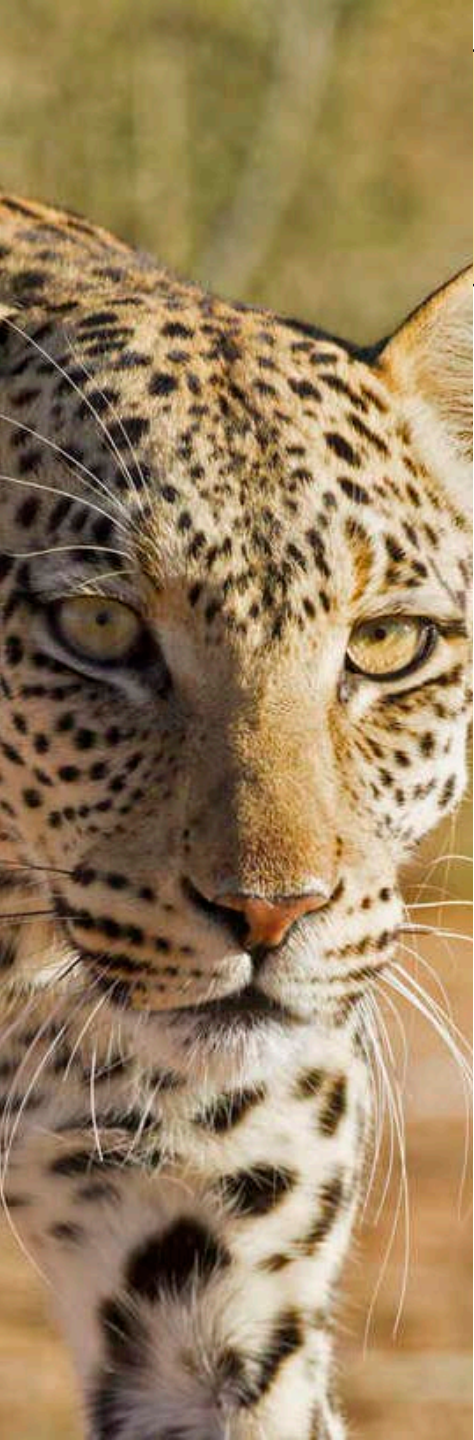

Leopard

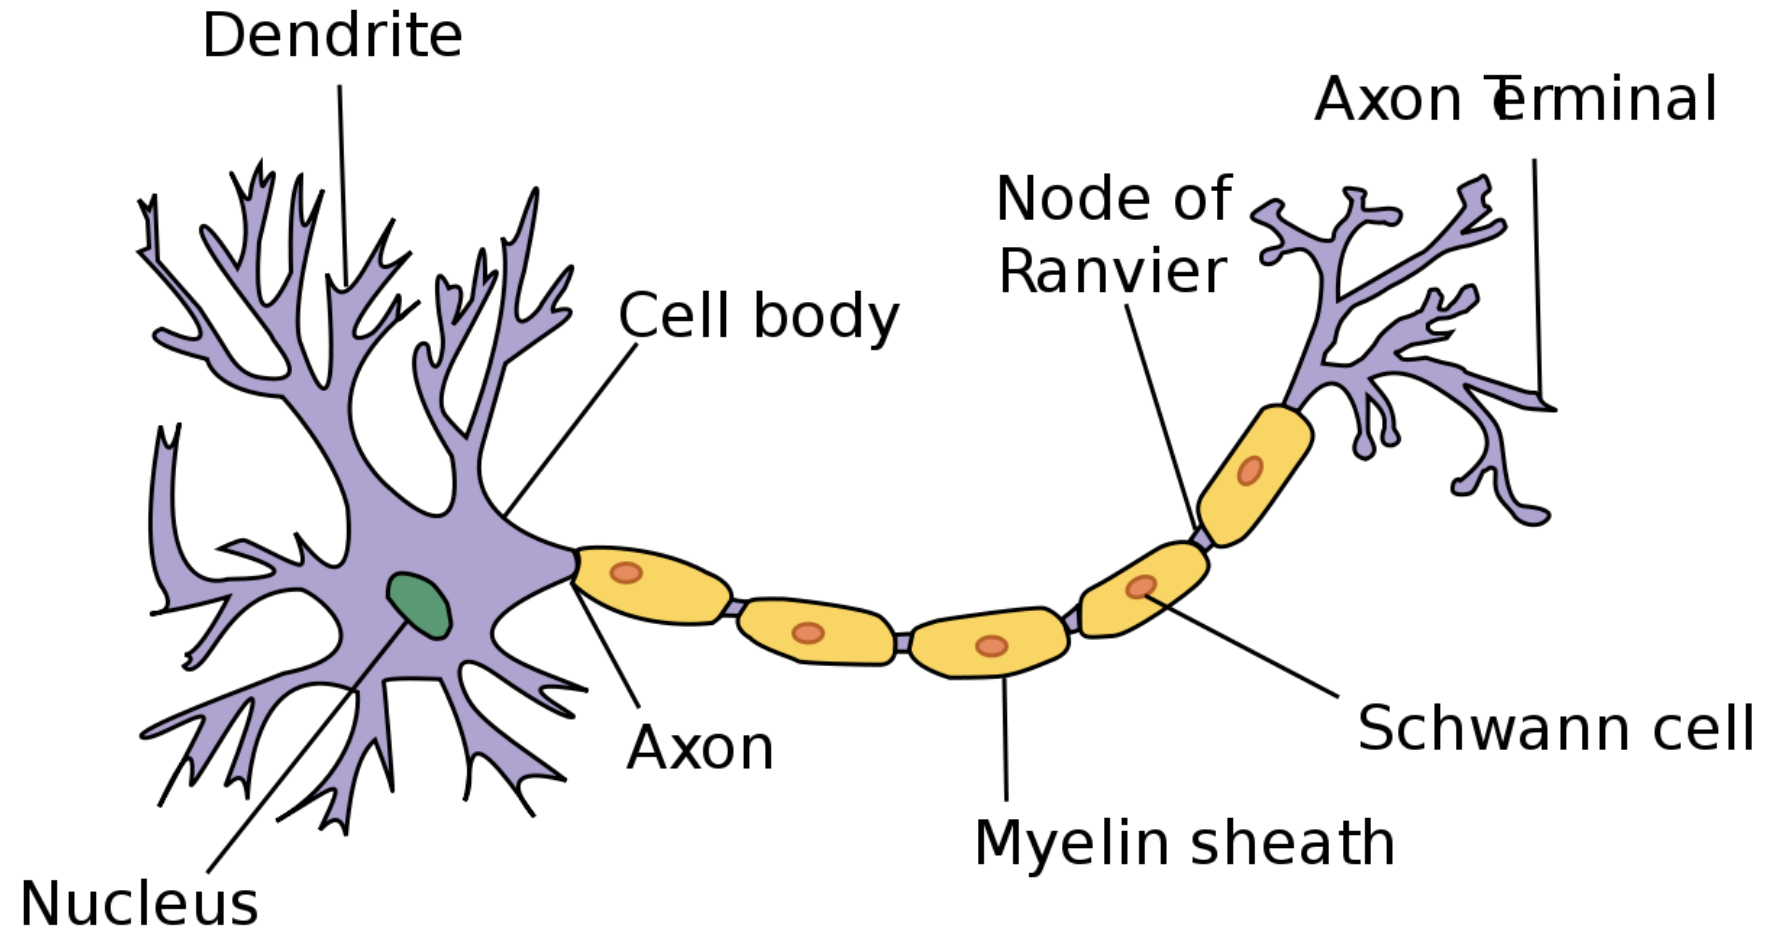

Panthera pardus

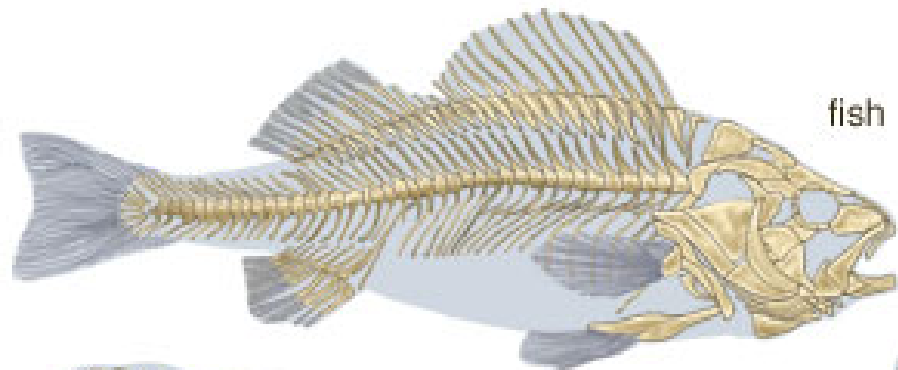

*How would we classify
this animal?*

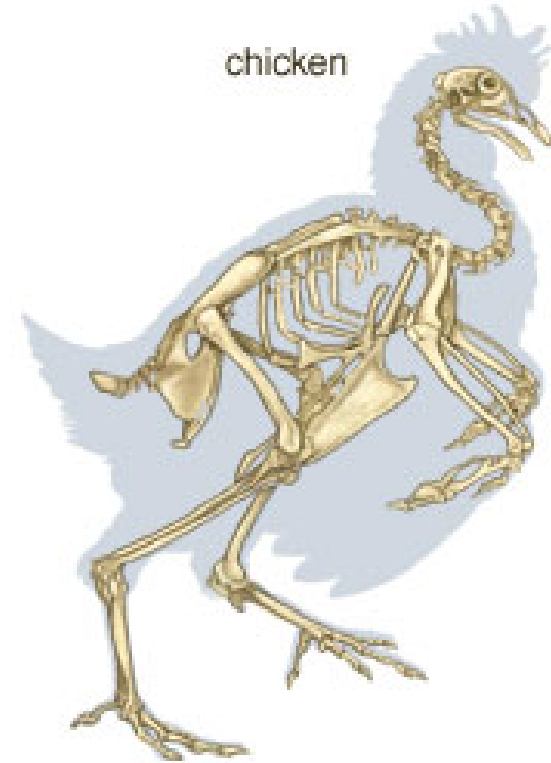

You will be studying how animals interact with their environments, how their bodies work and how this all ties in to the bigger picture.

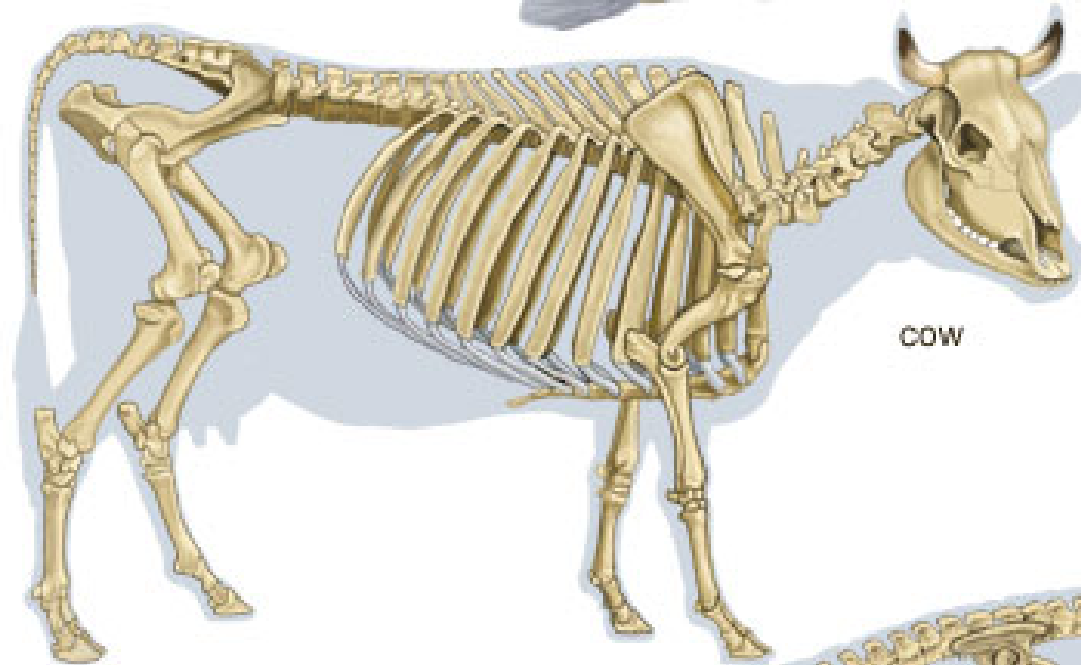

fish

chicken

cow

crocodile

Thank you for listening
